

Supratik Das

Analyst - SD

Hyderabad, India | supratikdas01@gmail.com | +91 8100434836 | [LinkedIn](#) | [GitHub](#)

Professional Summary

Analyst - SD with **7+ years of experience** in designing and delivering scalable web applications across frontend and backend. Strong expertise in **JavaScript, TypeScript, Angular, Node.js**, and **Java**-based services, with hands-on experience in **AWS** cloud environments. Skilled in **application monitoring and incident investigation** using **Splunk** and observability tools. Experienced with **NoSQL databases**, REST API development, and performance-critical e-commerce platforms serving high-traffic consumer workloads. Proven track record in code reviews, technical design ownership, and cross-team collaboration.

Core Skills

Languages	JavaScript (ES6+), TypeScript, Java
Frontend	Angular, HTML5, CSS3, Responsive Design
Backend	Node.js, REST APIs, Java/Spring Boot
Cloud & DevOps	AWS, CI/CD pipelines
Databases	MongoDB (NoSQL), PostgreSQL
Monitoring & Observability	Splunk (log analysis, dashboards), Google Analytics, GTM
Tools & Practices	Git, Bitbucket, Jira, Agile/Scrum, Code Reviews, Technical Documentation
Performance	Lighthouse audits, Web Performance optimization, Cross-browser compatibility

Professional Experience

Analyst - SD <i>Valuelabs (Client: Shutterstock Inc.)</i>	Oct 2023 – Present <i>Hyderabad, India</i>
- Designed and delivered frontend and backend solutions for Shutterstock.com, a high-traffic consumer e-commerce platform handling millions of monthly users. - Contributed development of product customization and UI builder features using JavaScript and Backbone.js, enabling real-time personalization of photo books and custom products. - Built and maintained Node.js backend services and RESTful APIs supporting complex product configuration and cart/checkout workflows. - Monitored application health and investigated production incidents using Splunk log analysis, driving rapid root-cause identification and remediation. - Deployed and managed application releases in Vercel, ensuring high availability and operational stability. - Translated business and stakeholder requirements into scalable technical solutions, guiding features through design, coding, testing, debugging, and optimization. - Conducted code reviews, contributed to architectural discussions, and mentored team members to improve long-term maintainability. - Collaborated closely with backend teams on API integration and system integration across microservices.	
Senior Software Engineer <i>HCLTech</i>	Jan 2022 – Sep 2023 <i>India</i>
- Developed enterprise-grade applications using Angular, TypeScript, JavaScript, and Node.js backend integrations. - Built reusable, modular UI components aligned with scalable frontend architecture, reducing development time by standardizing shared libraries. - Designed and consumed RESTful APIs with Java/Spring Boot backend services for enterprise workflows.	

- Implemented **Google Tag Manager** and **Google Analytics** for user journey tracking and conversion funnel analysis.
- Used **Splunk dashboards** to monitor application logs, track error rates, and support incident triage across production environments.
- Worked directly with stakeholders to clarify functional and technical requirements, delivering iterative releases in an Agile environment.
- Supported testing, debugging, and **performance tuning** across multiple production releases.

Software Engineer

Jan 2019 – Dec 2021

LegalKart

India

- Developed full-stack features using **JavaScript**, **Angular**, **Node.js**, **PostgreSQL**, and REST APIs in a fast-paced startup environment.
- Built and optimized backend services with **Node.js** and **MongoDB (NoSQL)**, supporting scalable application features and data storage.
- Contributed to **AWS-based deployment** workflows, managing application releases on cloud infrastructure.
- Automated data processing scripts using **Python**, improving operational efficiency for recurring tasks.
- Delivered multiple production releases with strong foundations in **system integration** and **Agile delivery**.

Key Projects

E-commerce Product Builder (*Shutterfly*)

Built a custom UI builder enabling users to personalize products in real time. Involved complex state management, high-traffic UI rendering with Backbone.js, and backend API orchestration via Node.js. Monitored production stability with Splunk.

JavaScript Execution Visualizer (*Personal Project* – jsvisualizer.bytefront.dev)

Designed and developed an interactive browser-based tool that animates JavaScript runtime execution, visualizing the call stack, event loop, promises, async/await, and task queues. Launched on Product Hunt and Dev.to; leveraged AI-assisted agents for execution flow validation.

Education

Master's in Computer Science / Engineering
Bachelor's in Computer Science / Engineering

West Bengal State University, 2017
West Bengal State University, 2015

Certifications

- Angular Advanced Workshop (Udemy, 2022)
- AWS Certified Developer Associate (In Progress)
